

*... your support is even more meaningful!*

Dear Friend,

To better serve our residents in 2012, we plan to renovate the second and fourth floor dining rooms at Mount Olivet Careview Home, purchase new chapel chairs, and develop an adaptive computer program for residents.

The success of the third floor dining room renovation several years ago improved the care provided by staff. The open view dining room enables caregivers to see residents in the dining room and hallways from various angles on the unit.

“Many residents relax in the dining room after meals and some are at risk for falls,” says Lucky Nwachukwu, third floor nurse manager. “Now we are able to keep our eyes on the residents at all times.”

The chairs in the Lund Chapel are original with the building addition completed in 1992. They served us well but are in need of replacement.

*If you find it in your heart  
to care for someone else,  
you will have succeeded.*

*–Maya Angelou*

With adaptive computer technology, residents will be able to send and receive emails, play games, do puzzles, and even watch a video. This kind of intellectual, social, mental, and physical stimulation will provide residents with an enhanced quality of life, a sense of accomplishment, and a connection to family and friends.

The total expense for these projects is \$100,000. We hope we can count on you to help us make these improvements possible. Your gift of any size will make a difference.

Wishing you and your family holidays filled with love and joy!

With heartfelt thanks,

*Thanks for  
your support!*
